

## SECURE

Designed with the bike enthusiast in mind, the stacked system locks BOTH the bike into place and the upper sliding mechanism for maximum security.

## DURABLE

Made with high-grade, 10 gauge steel, it is assembled using SAE Certified fasteners and coated with the latest in powder epoxy coating resin with exceptional rust and UV protection. The coating will withstand the rigors of everyday use.

## COST EFFECTIVE

Well built does **not** mean more expensive. Canadian designed and Canadian Made, we keep the cost down by leveraging the expertise of our closest vendors to achieve a price point that is reasonable and sustainable. Our modular design allows us to 'build' a solution-set for the space available. A Win-Win.

Rugged.  
Structurally Sound.  
Built to Last.

Wall Mount Stackable System

## FEATURES:

- Design Simplicity.
- Variations of installation configurations.
- Dense bike parking for maximum space constraints.
- Adjustable height assemblies for staggered bike patterns.
- Easy access to both upper and lower bike positions.

## PRODUCT SPECIFICATIONS:

<b>Material:</b>	10 Gauge, Cold-Rolled, High-Grade Steel
<b>Fasteners:</b>	All components are SAE Certified for Strength, Durability and Performance
<b>Coating:</b>	Powdered Polyester Resin (SandTEX Black Only)
<b>Sliding Mechanism:</b>	All components are high-grade Polypropylene for exceptional performance and durability
<b>Lift Mechanism:</b>	We designed and incorporated a Torsion Spring Lift Mechanism which has a Lifetime Warranty against failure – NO mechanical failure potential
<b>Lift Weight:</b>	Loaded with a bike, the lift weight requirement is only 12-15 pounds
<b>Lock Mechanism:</b>	Lower Level has a holes to allow for a chain/cable lock to secure the bike to the lower rack frame. The Upper Level has a Dual-Locking Mechanism – the Inner Channel slides with the bike for loading and unloading and a Lock Ring pivots in a channel to secure both the bike to the bike rack and the sliding Innre Channel to the bike rack frame

Proudly Canadian Designed and  
Canadian Made!

## DESIGN SUPPORT

Layout suggestions during the design phase.

CAD Layout for reference and approvals.

Custom product-mix layouts to achieve density requirements

## TURNKEY SOLUTION

Once the design is done ... we make sure everything else goes smoothly. When done, we hand over the 'keys' and everything is ready for use. We always include numbering so people know where their bike is.

## PRODUCT SOLUTIONS

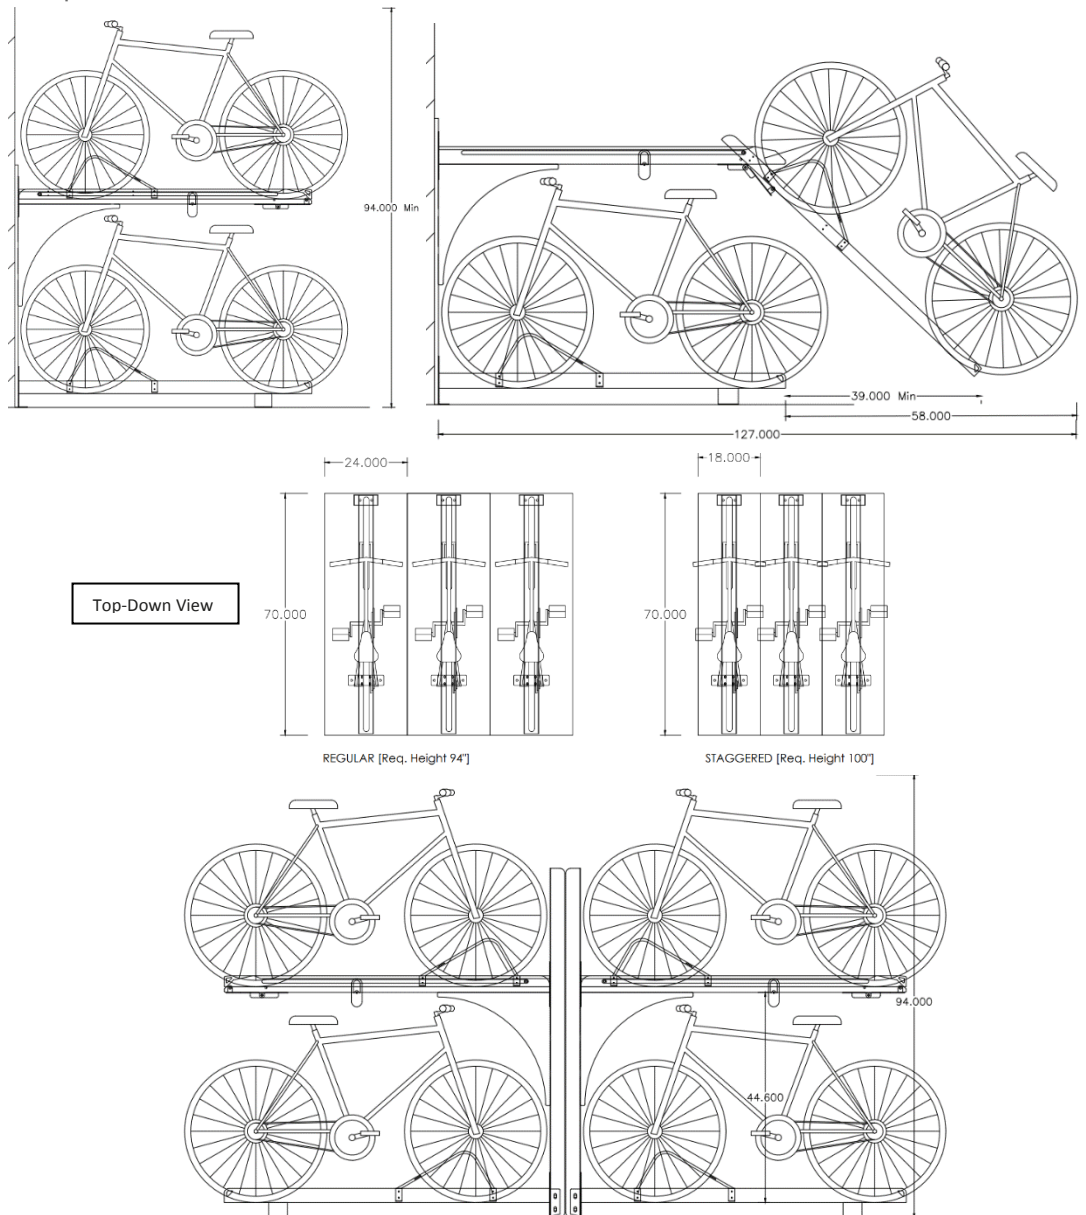

We have numerous design and layout configurations for the Stackable System:

- **Wall Mount** Version, 2 bikes
- **Pedestal** Version, 4 bikes
- **POD** Version which incorporates Vertical Bike Racks in a space-saving row

For more information on any of our products or services, please give us a call.

We'd be happy to assist you in finding the best solution for your project.

Giving our customer the ability to configure layouts to meet physical constraints is our forte. We work with our customers to identify the best solutions for density, diversity of products, and ensure adherence to strict cost containment. We ensure there are NO surprises!
