

SECURE

Designed to be as structurally sound as possible, our fencing materials and enclosure structures meet or exceed the architectural requirements for material and composition. Our fencing and enclosures provide the most robust solution for maximum security.

DURABLE

Made with high-grade, 14 gauge steel, it is assembled using SAE Certified fasteners and coated with the latest in powder epoxy coating resin with exceptional rust and UV protection. The coating will withstand the rigors of everyday use.

COST EFFECTIVE

Well built does **not** mean more expensive. Canadian designed and Canadian Made, we keep the cost down by leveraging the expertise of our closest vendors to achieve a price point that is reasonable and sustainable. Our modular design allows us to 'build' a solution-set for the space available. A Win-Win.

Rugged.

Structurally Sound.

Built to Last.

Custom Ceiling Barriers

High-Voltage Enclosures

Control Panel Enclosures

Pipe Enclosures

Press-Fan and Stairwell Fencing

Resident and Visitor Security Fencing

FEATURES:

- Design Simplicity
- Variations of design and installation configurations to meet customer and site requirements
- Our Standard includes High-Grade materials to exceed structural security and safety requirements

PRODUCT SPECIFICATIONS:

Enclosure Frame Material: 14 Gauge, Cold-Rolled, High-Grade Steel

Fencing Frame Material: Posts 2" x 2" 16 ga. High-Grade Square Tube

Fasteners: All components are SAE Certified for Strength, Durability and Performance

Coating: Powdered Epoxy Resin with UV and Maximum Rust Protection

Weldments: All weldments meet or exceed the CWB standards for light-gauge material welding of components which ensures exceptional performance and durability

Included: Durable 2"x2" Welded Mesh or ¾" Diamond Opening Expanded Mesh depending on application. Welded Locking Hasp on both Door and Frame

Installation: All installations are performed by our inhouse installation teams to ensure we meet or exceed the challenging installation schedules of our customers and partners

Proudly Canadian Designed and
Canadian Made!

DESIGN SUPPORT

Layout suggestions during the design phase. We measure the areas and then provide the Shop Drawings for review, modifications and/or approval. We use CAD for layouts for reference and approvals. Custom product-mix layouts to achieve security requirements.

TURNKEY SOLUTION

Once the design is done, the Shop Drawings are Approved ... we make sure everything else goes smoothly. When the installation is done, we hand over the 'keys' and everything is ready for use.

PRODUCT SOLUTIONS

We have numerous product solutions to meet security requirements:

- **Hi-Voltage Electrical Enclosures** – all our custom designs are to meet the high safety standards of Ontario Hydro
- **Stairwell Enclosures** – our designs keep in mind both security and accessibility for the maintenance team.
- **Security Fencing for Garages** – keeping all the area secured is a top priority for both design and build. We specialize in designing and building the most efficient and robust security fencing while maintaining the best in esthetics and function.

For more information on any of our products or services, please give us a call.

We'd be happy to assist you in finding the best solution for your project.

Giving our customer the ability to configure layouts to meet physical constraints is our forte. We work with our customers to identify the best solutions for density, diversity of products, and ensure adherence to strict cost containment. We ensure there are NO surprises!

Hydro Approved Hi-Voltage Electrical Enclosures with Access

Single OR Double-Door Control Enclosures (with expanded mesh)

Press Fan and Stairwell Fencing with Access Door

Pipe Enclosures with Access Doors

Garage Security Fencing

TECHNICAL SUPPORT AVAILABLE

- Technical Review of Architectural Layouts
- Detailed Shop Drawings with Recommended Installation Patterns
- Installation of Products
